

Innovators above the standards

At HiRef, we produce **integrated air conditioning solutions** for heat control and recovery.

We deliver **outstanding energy performance and efficiency** thanks to meticulous analytics, innovative ideas and ceaseless research.

MPS Reversible, multi-purpose, high-temperature air condensed heat pumps

INDUSTRIAL

SERVICES

MPS is the HiRef range of air-to-water multi-purpose reversible heat pumps designed to operate in **very cold weather, ensuring simultaneous production of hot and cold water**.

Use of compressors with EVI steam injection technology lets you produce domestic hot water at temperatures of up to 65°C and operate with outdoor temperatures as low as -20°C.
