

High performance and multipurpose

New series **PSW**

Power range: 330 – 700 kW

Class A multipurpose water-condensed heat pumps with scroll compressors and shell and tube heat exchangers

Super low noise set-up available

Available with A2L refrigerant (R454B) or in A2L Ready version

- + **Maximised efficiency** both at full and at partial loads
- + **Shell and tube** for industrial applications
- + High efficiency **scroll compressors** with motors featuring direct start permanent magnet technology
- + **Easy access to internal components** for routine maintenance
- + Optimised **software** for ideal management of multiple units in parallel
